Purpose of Inspection:

As a new inspector to this area, this inspection was mainly to find the site and assess the amount of disturbance.

Inspection Summary:

I tried to access the site and got to the gate which crosses private land and it was locked and therefore I was denied any access to the site. Talking to Paul Baker, the last inspector, who inspected the site, he said this gate had never been closed when he visited the site.

Photos were taken to document site conditions.

Conclusions and Recommendations:

Talk to the permittee about access and location of the site.
